

## Stative Verbs List

Some verbs are only (or mostly) used in simple tenses, and are not used in continuous tenses. An example of a simple tense is the present simple, or the past simple. An example of a continuous tense is the present continuous or past continuous. These verbs are called stative, or state verbs. A verb which isn't stative is called a dynamic verb, and is usually an action. Often stative verbs are about liking or disliking something, or about a mental state, not about an action.
